MAYFIELD TOWN

Mayor's Corner

July 1, 2023

We were very fortunate that the temperatures were almost perfect for allowing the snow to melt and the water to come off the mountain without high surges which occur on hot days. The highest run off this year came after the irrigation company started using water. The highest water flow at the Park bridge was about 4" deep. We still had nearly 2' - 6" of clearance from the water to the beams.

We are looking forward to a great summer of celebrations. Independence Day on July 4th, then we have Mayfield Pioneer day on July 24th. The first men to view Mayfield as a possible place to establish homes was in 1871. They started some activities in 1872 and then establish homes in 1873. 2023 marks 150 years from the first groups of settlers to establish residences in Mayfield. SO, WE WANT TO CELEBRATE!!!

July 24 we will have our usual celebrations with a Fun Run, Parade, then Activities and dinner at the Park. We will have entertainment, auction to continue to improve the town. We need many volunteers to help as we have in the past. This event could not happen without all the help from the Mayfield Lions Club members, Town Leaders, and especially you as citizens. We also appreciate all the wonderful visitors who come to enjoy the day. We need volunteers to help with all the kids booth activities, games. We are excited to have enough water in the creek to float the "ducks". We will need help setting up the canopies and booths. Please watch for the announcement.

The Lions Club is also planning a special Centennial Celebration activity for September. Watch Mayfield Community Facebook page, the bulletin board.

We are in need of volunteers to help with some items around town. We have one full time employee and a part time employee. The lawn mowing takes approximately 2 ½ days a week. Then to fit in the water meter reading, new connections, new projects and general fix ups. In the summer it will take two full time people. If you have time and could spend a couple of hours a week helping us out, Let us know at the town hall and we can get you set up with something that would occur each week.

We live in a great community with great citizens. I want to thank our employees for all they do.

Amanda Bennett, Mayfield Town Recorder, Town coordination, cemetery, Budget and correspondence.

Krista Dutton, Mayfield Town Treasurer, Accounts receivables, Parade Chairman, Water records. Water billings.

Jake Nielsen, Mayfield Town Facilities Management and Maintenance.

Garrick Willden, Mayfield Town Water Engineer

Mayor Steve Anderson,

Council Members: Aaron Peterson, Mike Bennett, Jake Dyreng, Mitzi Fuller.

UPCOMING DATES

4th - Independence Day

12th - Town Council @ 7PM

24th - Pioneer Day

24th of July:

If you would like to be a part of Mayfield's Parade, Lineup will begin at 9:30 AM on 100 N. at Doug Bjerregaard's house and will continue on 200 W.

Parade will begin at 10:00AM

- We are looking for some volunteers for July 24th celebration. If you would like to volunteer please contact John Glauser at 801-651-7711
- Lions Club Hats and Stickers are available in the office
Hat: \$20.00
Stickers: \$5.00
- Check out our Facebook Page "Mayfield Community" for all the latest updates.

We the Town Members would like to thank Jake Nielson for going above and beyond with his work here at Mayfield Town. He has been working extra hard to provide what is needed for our town. After a hard winter this spring was not easy. If you see Jake around town please tell him Thank You.

Mayfield's 2023 Grand Marshall

Grant and Janet Hansen have lived their entire married life in Mayfield. Grant was born in Mayfield to Gayle and Iva Mae Hansen, attended local schools and graduated from Gunnison Valley High School.

Grant received a bachelor's degree in elementary education followed by a master's degree. Grant served a LDS Mission to South Africa. Janet Anderson grew up in Gunnison, daughter of Don and Twyla Anderson of Gunnison. Janet also graduated from Gunnison Valley High School followed by a bachelor's degree in elementary Education.

In 1961, the schools combined, and they both attended GVES. But they really didn't get acquainted until Janet was a sophomore and Grant was a junior. Yes, they were high school sweethearts. Grant left after his senior year to serve a mission in South Africa. He didn't date. Janet finished high school and moved on to Snow College. She did date. Fortunately for both they dated each other and ended up marrying in 1974. By then, Janet had completed her teacher training, graduated from USU and got a job teaching first grade in Ephraim. She taught there for six years until Rory came along and she gave up her teaching career to be a full-time mom.

Grant loves the outdoors and the cows. They raised prize Simmental and Angus bulls that sold to cattlemen in 13 different states.

Later, Grant decided that teaching stuff looked pretty good. He went back to school and started teaching in 1976. He taught grades four through seven, but always says sixth graders are his favorites. He taught school for 17 years and was a principal for 22 years. He has also served on the school board for 6 1/2 years.

They had twin boys in 1984. They were born 12 weeks early with pneumonia. Rhett only lived a few hours. Without ever planning to, Janet became mom and nurse to a very sick, very little boy. Fortunately, prayers were answered, and Kyle healed and grew way beyond his beginning. When Kyle got healthier, Janet taught preschool in their home.

Early on in their marriage, they became the town's water meter readers. There were always surprises on what they would find in the meter holes: carrots, potatoes and spiders. Lots of spiders! Their record was 13 black widow spiders in one summer.

They've enjoyed helping with 24th of July celebrations ever since they got married. Their favorites were on 12-Mile Flats and when their boys would perform in the famous Mayfield Town talent shows. Their boys weren't always as excited to perform every year for the 24th of July Celebration.

Over the years, they've been involved in community activities. Janet's dedicated herself to church callings; mostly in the primary on the ward and stake level. She made it so Grant could serve in church callings. He has been bishop, high council, a member of the Mormon Miracle Pageant Presidency and President of the YSA Branch. He's served on many boards and councils, including Mayfield Mayor, councilman and zoning administrator (for over 20 years).

Their favorite accomplishments have been those they've done together; teaching, working in the Young Single Adult Branch, raising their boys and loving their grandkids.

A big thank you to Brent and Janet for all you both have done for our town

AUGUST 2023

MAYFIELD TOWN

Mayor's Corner

August 1, 2023

I want to thank everyone who helped make Mayfield 24th celebration a success. For many it started early in the year making items for the auction. Much effort was involved in planning success in the activities for all to participate in. We have many traditional activities for all ages as well as some new ones that we could all participate in. We are grateful for all who helped in any way with any of the activities. From the set-up of all booths, chairs, food and drink vending, planning, to the operation of all the activities. Many of the activities were ones which have become a staple, to those added for the first time.

The activities started early for some, with the 5k Fun Run starting at 7:00 AM, managed by the Mayfield Town Youth Council and Advisors Steven and Alisa Liddiard. The Pickleball

Tournament also started at 7:00 AM, organized by Britney Later, a new resident and staffed by Britney's parents, while Jarom tended kids. A car show was an added attraction for all to enjoy. I marvel at the work that goes into making the cars so immaculate. Thanks to Val and Mitzi Fuller for organizing this. There was a Remote-Control Airplane display on the concrete at the Am phi-theater.

We had good food from Garrick Willden and the crew under the canopy. Shari Malmgren provided and sold her famous Chicken Berry Salad's as a Cancer fund raiser. Thanks to all who operated booths and events in the sun.

would like to the Lions Club members, and friends who helped with the Duck Race (Pluck) and those who supported it. Thanks to the Auction contributors, auctioneers and those who generously purchased items. Thanks for the entertainment, Junction 89 and Gary Smith for this additional sound system and music. We call this a Mayfield Celebration, but we have so many people who do not live within the town boundaries but participate with us and are very much a part of the community. Thank you.

A special recognition to Grant and Janet Hansen, our Grand Marshalls for 2023 our Sesquicentennial year. They have provided a lifetime of service to this community and its people. They are moving to Salem to be closer to their children and grandchildren.

Also, a thank you to Alan Gardner, Sanpete County Sheriff's Dept. and Utah Highway Patrol for their help with Traffic Control. This year we created a bypass route for those going and coming from the mountains.

Upcoming Mayfield Sesquicentennial Celebration September 9, 2023. Mark your calendar.

Thanks to Town Council Members: Aaron Peterson, Mike Bennett, Jake Dyreng, Mitzi Fuller. Mayor Steve Anderson,

UPCOMING DATES

9th - Truth in Taxation Public Hearing @ 6PM

9th - Town Council @ 7PM

MAYFIELD'S 24TH CELEBRATION WINNERS

- **Pickleball Tournament**
Court 1:
1st Kyle Olsen
2nd Laurie Christiansen
3rd Denton Marks
- **Court 2:**
1st Tyler Hawks
2nd Ken Barber
3rd Lex
- **5 K Run Run**
1st Kaydon Whitlock
2nd Krew Donaldson
3rd Kara Olsen
- **Pig Race**
Macady Peterson
Wes Coates' grandson
- **Duck Race**
1st Kami Millett
2nd Dixie Christensen
3rd Jeni Burtrich
- Check out our Facebook Page "Mayfield Community" for all the latest updates.

- What a wonderful 24th of July Celebration Mayfield had. We are so thankful for everyone's hard work to make Mayfields 24th celebration one to remember. We are looking forward to next years.
- Mark you calendars! Saturday September 9th Mayfield Town is celebrating our 150th Birthday! Stay tuned for more info on our Sesquicentennial Celebration!

VOL. 1 NO. 9

September 1st, 2023 - September 30th, 2023

1873- 2023

A time for **GRATITUDE & REMEMBRANCE**

With thoughts of those who have done so much to make
"Life is better here" for all of us.

The Mayors Corner

Upcoming Mayfield Sesquicentennial Celebration September 9, 2023. Mark your calendars. We wanted to have an evening of community celebration of those who made Mayfield what it is today. We are a Community of those who live within the town boundaries, but also those who live in the south fields, up the canyon and down through Christiansburg. So come and enjoy an evening of a little bit of history, a little bit of folklore, a little bit of music and a little bit of food. We have multiple histories reflecting on the events of Mayfield through the years. We are always Interested in adding to the stories that you have. If you have stories of your ancestors, please share them to add to our history.

A couple of items I have from my ancestors:

Logging was an integral part of the 12- mile Canyon. There was a sawmill located at several locations in the canyon. There was even a sawmill located at the top of town opposite the irrigation ponds. When they closed the sawmill at Blue Lake in the corner my grandfather dismantled the bunk house and reassembled it as part of his home here in Mayfield.

Dairy was an important part of Mayfield. The local group moved cows up the mountain and would graze them below where The Old Ranger Station was across from the Six Mile turn off. They would milk the cow's morning and night there, cool the milk in the creeks and then transport the milk to town.

Some of the early residents of Mayfield moved across the mountain and settled Emery town in Emery County. To keep In touch with relatives and friends they had a community reunion on top of the mountain each summer. Emery would come the Muddy and Link Canyon roads and Mayfield would travel up Beaver Creek and they would meet at the Baseball flats for the week.

The first telephone line into Mayfield was built directly west from Mayfield over the Whitehill's from Gunnison. There was a road through the Whitehill's that started just south of the cemetery and ended up near the Sanpete County Landfill.

Those who have preceded us have left a rich legacy. Over the years many families have moved to other locations and many families have moved to Mayfield. This has added much to this community. We hope that all feel welcome and appreciated.

MADS P. SORENSEN

Mads Peter Sorensen was born in Horim, Hvirring Parish, Denmark, Feb 5th, 1836 to Soren and Annie Sorenson. He traveled to the United States in the last days of April of 1863. He located his family in Manti until the spring of 1865.

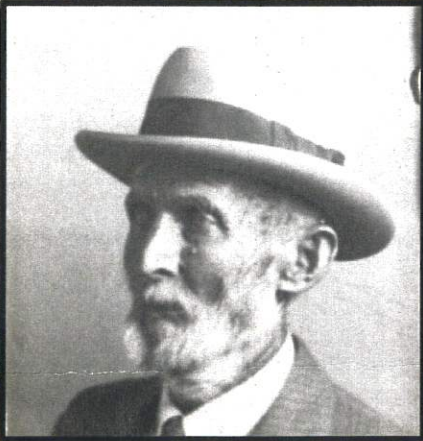

In May 1870, Mads Peter Sorensen, Simon Hansen and Carl Olsen drove their ox teams to Twelve - Mile Canyon to cut timber. They passed through Arapeen Valley and decided to move there. So for the next three years they platted crops, dug ditches and Mads P. built the first home in Mayfield located on the north side of Twelve - Mile creek. He was the first settler in Mayfield moving his family here in the spring of 1873.

Carl Magnus Olsen was Born May 27th 1833 in Malmo, Sweden to Ole Monson and Hanna Zachrisdotter. Carl was the oldest of six children. On May 1, 1861 he bored a ship and spent thirty-one days at sea. His old friend, Mads Peter Sorensen was also aboard the ship.

Carl volunteered to take his family and move to Sanpete Valley, then his moved to Richfield, next he moved to Gunnison. There he met two of his old friends Mads Peter Sorensen and Simon Hansen. These three made many trips by ox teams into the Twelve mile Canyon, bringing out logs for building cabins. On one of these trips they viewed the valley of Arapeen, named after the great Indian chief. They decided at once to make their permanent home in this beautiful valley.

Carl M. Olsen

Simon Hansen

Simon Hansen was born November 6th 1842, in Rolokke, Kobelev, Halsted Kolsters, Denmark, his father, Hans Simonsen, was 44 and his mother, Mette Cathrine Johansdatter or Johansen, was 39. He Married Maria Gudmundsen on July 24th 1867, in Gunnison. They were the parents of at least 1 son and 1 daughter.

He lived in Kobelev, Kobelev, Halsted Klosters, Denmark in 1850 and Gridley, Butte, California in 1910. Simon died on March 15th 1934, in McGill, White Pine, Nevada. at the age of 91. He is buried in Mayfield.

(Unfortunately there is not a lot of information about Simon Hansen, If you know any info about Mr. Simon Hansen please get with Linda Miller.)

The Mighty Ute Indian were under the supreme leadership of Chief Wakara (Walker) One of the lesser Chiefs was Arapeen, brother of Walker. After Chief Walker's death, Arapeen became the big Chief of the Utes, and he at once Asked to make peace with the settlers. Arapeen was not as aggressive and warlike as Walker had been, but settlers were ever on the alert for further treachery.

Arapeen's tepee stood on the brink of the hill just back of where the Mayfield Church stands today. There, overlooking the Indian farm. He had his own little domain.

Chief Arapeen

Mayor's Corner
October 1, 2023

We had a wonderful time celebrating all our heritage and remembering past events. We are writing our own history as plan for the future. We are continually looking for histories and stories of those who built the things we enjoy today. We have had some requests to continue to have a relaxing social occasionally throughout the summer days. Let us know if you would like these to continue.

Mayfield has grown through the years from a very rural community to one where we now live closer together and have many more amenities. In the earliest days a trip to Manti was a full day's event. Now we can plan a trip to Manti, conduct some business and return in an hour.

In the original layout of the south side of town the blocks were 462' x 462' and were divided into 4 lots of approximately 1.25 acres each. Plenty of room between neighbors??? But they still had disagreements when cows, sheep or horses would get out. There are stories of teenage boys moving peoples milk cows around on Halloween night so that the father would get up in the morning and find the wrong cows in his corral. As ¼ block lots gave way to smaller lots we became closer neighbors. Smaller lots put homes and out buildings closer together which thus requires each of us to be considerate of the effect of our activities have on our neighbors. We can no longer say that I was here first or I am entitled. Mayfield, like other towns, have established ordinances governing what is allowed and what is prohibited inside the town limits and the size of lots required for specific activities.

Having large animals both inside the town limits and in the town buffer zones are allowed by ordinance if the lot sizes are sufficient to house them and not create a nuisance of odor or flies. The keeping of animals is regulated. They are not allowed to roam freely so that they do not become a nuisance. We have banned dogs from the park because we have had children step or fall on dog poop that was not picked up by the owner or from a dog running loose. Many times, the ordinances are written that affect 100% of the people when only 5% are creating the need for ordinances. If we choose to live in a community, we are obligated to accept the ordinances as established. Ordinances are established for the good of all. Times change and the need for adjustment to the ordinances is an ongoing process. An engaged electorate helps us all work to establish a special community. We thank you all for your help in making Mayfield a special place, not only for its beautiful surrounding, but it each of you as citizens. Thanks to all of you.

Mayor Steve Anderson

Thank you so much for making our 150th Birthday Party (Sesquicentennial) a success! We are fortunate to have talented locals who are willing to have fun and help us out on things like this! THANK YOU :)

UPCOMING DATES

- Oct. 9th- Columbus Day- Office Closed
- Oct. 11th- Town Council 7pm - public meeting everyone welcome
- Oct. 31st- Halloween

Hi, my name is Keston Christiansen. I have been a resident of Mayfield for 39 years, the son of Robert and Diane Christiansen. I am a graduate of Gunnison Valley High School and Snow College. I have 2 daughters, Aubrey age 11 and Layla 8 months.

My career as a Machinist/CNC Programmer has had me in manufacturing where I worked for Christensen Arms and now for Future Comp in Gunnison, Utah. In my spare time I enjoy playing guitar, mechanics, hunting and family time.

I have been blessed to be a part of Mayfield my entire life and look forward to an opportunity where I can give back to the community that has given to me for so long.

I believe in honesty, hard work, and responsibility.

My values and interests can be an asset for the Town Council, and I look forward to serving the residents by continuing to make this the best place to live! If you have questions or concerns, please contact me 435-851-1158 or by email at kestonc@live.com

Thank you,

Keston Christiansen

I have always loved serving and being part of the Mayfield community. I am very excited for the possible opportunity to serve on the Mayfield Town Council. My experience working for local government began when I started working for Gunnison City as their Treasurer; a position I held for 5 years. I married Kendall Bartholomew in 1979, and a year later we moved to Mayfield and have lived here for over 40 years. I immediately fell in love with Mayfield and especially the amazing people who lived there. Shortly after moving to town one of my first opportunities to serve Mayfield was on the beautification committee and we were able complete several projects in the community.

Then in 1994 I interviewed for the position for Mayfield Town Treasurer and later become the Mayfield Town Recorder. I worked for the Town of Mayfield for 28 years and I am so grateful for that opportunity. I thoroughly enjoyed serving the amazing people of Mayfield. I was given so many great opportunities to learn and grow as a person.

I also worked for South Sanpete School District for 28 years. I worked in the preschool program for 14 years and in the special education program for another 14 years. I absolutely loved my job at the school and I am thankful for all that I learned from all our outstanding educators that I worked with and also all the amazing students I worked with through the years. Kendall and I were blessed with two wonderful children, Ronda and Kris, and we now have 5 amazing grandchildren. I feel that because of all the years I have worked with the Town and the schools I can bring so many great ideas to the table. I'm a hard worker and take pride in what I do.

Please check the box and vote for Catherine Bartholomew for Mayfield Town Council.

Wendy Poland Rentmeister was born an Army Brat to Ralph and Carolyn Carter Poland at Fort Jackson, Columbia, South Carolina. Wendy was raised in Riverton, Utah when Riverton was a small town. She graduated from Bingham High School. Wendy lived in the very small town of Herriman, Utah for 18 years with her first husband and 5 children. She was very active in the Herriman Community as a Lions Club member. Wendy spent 5 years as a single mother before marrying David Rentmeister in 2005. David was also raised in Riverton, Utah. Together David and Wendy share a blended family of 8 adult children and their spouses, 22 grandchildren, with one expected in November and 1 great granddaughter.

Wendy and David moved to Mayfield in 2016. They transferred from Utah Department of Corrections in Draper to Gunnison. Wendy retired from Utah Department of Corrections in 2019. She is currently working as a Paraprofessional at Gunnison Elementary, working with severe special ed students.

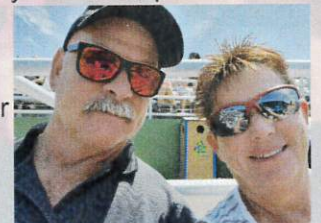

Wendy loves spending time with her family. She enjoys living in a small town, where life seems to be at a slower pace, where neighbors know each other by name, wave to each other on the street and sometimes even work together.

Hi, my name is Catherine Medler, most of you know me by the last name of Coulter. I have lived in Mayfield for the past 33yrs. This town has become home to me and my family. That is one of the reasons I am running for City Council. I would like it to stay the small town feel with the growth that it needs. I previously served on the City Council for a brief time. I was also on the Planning and Zoning committee with Grant Hansen. He taught me a lot about people and our town. I feel that doing research on projects before they are implemented is necessary. To find out everything from cost to efficiency. Working as a team with the other board members is also especially important to me. Another thing that is important to me is listening to the people of our town. They have an opinion also.

I feel that I would be an asset to this town if elected. Thank you for your support.

Catherine Medler

Hi! I am Mitzi Fuller (Myra to some!) I am running for on the Mayfield Town Council seats in the upcoming election. I have been an interum council member for the past few months, covering an open seat left by one the members that had to move away from our beautiful town.

My husband and I have lived in Mayfield twice, only to move away for a moderately short amount of time because of no job availability during that period. My husband is Val Fuller and we have been married 54 years. We have 4 children (Bruce, Brandon, Tina and Michael) 7 grandchildren, 9 great grandchildren.

I am a registered nurse and have worked in many different areas during my 38 years in nursing. Before getting my nursing degree, I was a volunteer EMT for 15+ years in the Gunnison Mayfield area. I have been a scout leader, a horse 4-H leader, and I am currently on the Sanpete County Humanitarian Council, working with some of the troubled youth, and helping to organize the annual Toys for Tots donations drive. I also help with the Tree of Angels.

For recreation my husband and I love to go up Twelve Mile Canyon and see all of the majesty it holds, along with the beautiful wild animal population. We also have classic cars that we display at shows around the State and sometimes outside of Utah.

Being a member of the Mayfield Town Council for the last while I have been able to learn more about what makes our little town click, as well as some of the concerns our residents have and suggestions as to how we can possible rectify those concerns. I would like to continue on the Council to help our residents with their concerns and suggestions, and to help keep our town one of the best in Utah,

Thank you Mitzi Fuller

BAKE SALE

Lions Club Fall Bake Sale

This year, the Lions Club Bake Sale is on Thursday and Friday, October 19th & 20th, Just before the opening of the Deer Hunt. As in previous years, we are encouraging Community members to participate either by Purchasing the delicious goods or by contributing items for sale. We need a variety of soups bake goods such as bread, sweet rolls, cookies and candies. Baked goods should be packaged in salable units

For question about items to contribute or helping with the sale, contact Sharon Bjerregaard.
PH: 435-528-3651
Cell: 435-262-0060

DRINKING WATER SOURCE PROTECTION

Mayfield Town has completed Updated Drinking Water Source Protection (DWSP) Plans to protect our drinking water from contamination. While not all of you live within our DWSP zones, some of you do. However, if all of us follow the suggestions listed below, groundwater is less likely to be contaminated:

Septic Systems

1. Do not use garbage disposals. Garbage disposals add massive amounts of solids to the septic tank and are a leading factor of clogged systems.
2. Do not dispose of disposable diapers, sanitary napkins, paper towels, colored toilet paper or tissues in the septic system. These wastes do not decompose.
3. Do not put fat, grease, or oil (including cooking oil) down the drain. These items can pass through the septic tank and clog the leaching field.
4. Pump out septic systems every three to five years.
5. Conserve water. The less water is used, the longer the retention period in the tank and the more solids and bacteria can decompose. Install water saving devices.
6. Do not use enzymes or acid for treating your septic tank.
7. Avoid extreme peak flows by spacing out laundry loads, bathing and dish washing.
8. Do not put chemicals into the septic tank for the purpose of maintaining or declogging the leach field. There are no known chemicals, yeasts, bacteria, enzymes or other substances capable of eliminating or reducing the sludge and scum so that periodic pumping is unnecessary. Many of these cleaners contain highly concentrated organic solvents that are not biodegradable and pose a serious threat to groundwater.
9. Do not dispose of pesticides, disinfectants, acids, medicine, paint thinners and other household hazardous wastes in the septic system. These wastes will kill the helpful bacteria in the tank and may contaminate groundwater.

Insect Sprays and Weed Killers

Special precautions should be taken when disposing of empty containers. Rinse the container three times with water and use the rinse water in the same manner the original product was intended. Then wrap the container securely in plastic and dispose of it in the trash. Unused products should be taken to a solid waste facility.

1. Minimize the use of chemical products and use only as directed.
2. Consider using less toxic alternative products.
3. Consider "co-planting" using companion plants that act as natural deterrents to pests.
4. Use plant guards, such as paper or tin barriers to deter insects.
5. Consider using traps of various kinds to trap pests.
6. Hand pick weeds as much as possible or use weed killers in limited spot applications.
7. Use heavy mulching around plants to deter weed growth.

Fertilizers

1. Minimize the use of chemical fertilizers.
2. Water lawns normally after fertilizing rather than waiting for a rainstorm.
3. Allow grass clippings to remain on the lawn.
4. Mow high (about 2 inches), mow often and use sharp blades.
5. Water deeply but not too often.
6. Remove thatch build-up when it gets over ½ inch.

Household Hazardous Waste

The best way to handle household hazardous materials is to completely use the product before disposing of the container. If this is not possible, then the next alternative is to return unused portions to your community household hazardous waste clean-up day. Keep products in their original package with all labels intact. If the container is leaking, place it in thick plastic bag. Pack the products in a plastic-lined cardboard box to prevent leaks and breakage.

1. Do not flush household hazardous waste down the toilet.
2. Do not pour household hazardous waste down the sink.
3. Do not pour household hazardous waste down a storm drain.
4. Do not pour household hazardous waste on the ground.
5. Read label precautions and follow directions for safe use.
6. Recycle/dispose of empty containers properly.
7. Share what you can't use with friends or neighbors.
8. Store properly.
9. Use recommended amounts; more is not necessarily better.
10. Use the child-resistant closures and keep them on tightly.

Livestock, Poultry and Horse Waste

If you have animals, please consider that animal waste contains many pollutants that can contaminate surface water and groundwater used as drinking water sources. Probably the greatest health concern associated with livestock, poultry and horse wastes is pathogens. Many pathogens found in animal waste can infect humans if ingested. Organisms like Cryptosporidium, Giardia lamblia and Salmonella can induce symptoms ranging from skin sores to chest pain. E. coli, which causes diarrhea and abdominal gas, had been the source of disease outbreaks in several states. Particularly virulent strains of E. coli can cause serious illness and even death. Cryptosporidium is of particular concern because it is highly resistant to disinfection with chlorine. This protozoan causes gastrointestinal illness that lasts 2 to 10 days in healthy individuals but can be fatal in people with weakened immune systems. Cryptosporidium was responsible for more than 50 deaths and an estimated 403,000 illnesses after contaminating a Milwaukee drinking water supply. Runoff from cow manure application sites was a suspected source of the Cryptosporidium.

1. Do not let runoff through animal waste accumulation areas flow off your property.
2. Establish a vegetative buffer zone down-slope to detain and absorb waste.
3. Any manure that has accumulated in piles should be periodically hauled off and spread out on pasture or crop land.

Agricultural Cropland

1. Pesticides must be used in strict accordance with label instructions ("the label is the law").
2. The chemical in fertilizer that can most easily pollute groundwater is a form of nitrogen called nitrate. Nitrate moves readily in soil to the groundwater strata. The best way to prevent the movement of nitrate into the groundwater is to apply no more than crops can use during the time that the plants are growing.

Thank you for your efforts in protecting one of our community's most valuable resources. By working together we can ensure that Mayfield Town continues to have a safe and adequate supply of water for many years to come. If you would like to review our DWSP Plan, it is available at our Town Hall. Please call 435-528-5061, if you have questions or concerns.

YOU CAN AFFECT THE QUALITY OF THE WATER YOU DRINK

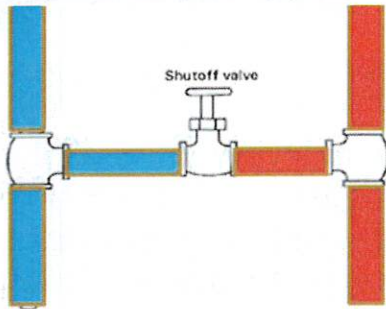

Many public drinking water systems are contaminated each year by pollutants or contaminants that backflow into the water system through unprotected cross-connections.

Identifying and eliminating or protecting cross connections is a matter of public health!

What is a Cross-Connection?

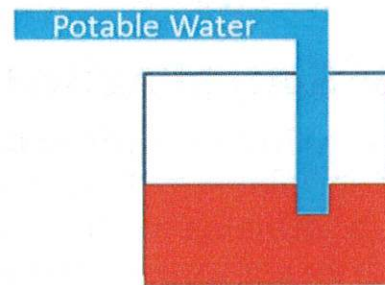

A **cross-connection** is a physical connection (piping configuration) between the public drinking water system and anything else, including another

water supply that can allow undesirable pollutants or contaminants to backflow into the public drinking water system.

Drinking Water

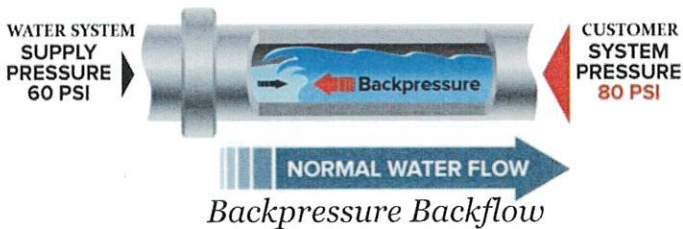

Non-potable water or substance

What is Backflow?

Backflow is the reversal of flow from a residential or commercial water system back into the public drinking water system. A backflow incident could occur if the water systems pressure decreases, or the

customer's water pressure is higher than the water systems pressure. A backflow incident could carry pollutants or contaminants into our public drinking water supplies making them unsafe to use.

The Plumbing Code and the Utah Public Drinking Water Rules require that all cross connections be eliminated or protected against backflow by installing an

approved backflow device or assembly that will insure that no impurities or contaminants are introduced to the public drinking water supply.

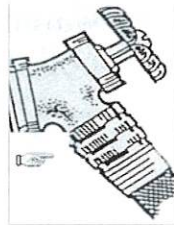

Can I protect my home or business from the dangers associated with cross-connections and backflow?

Yes! Several common cross connections are described below:

Threaded Hose Connections (Hose Bibs)

A large majority of backflow incidents are created by the common garden hose. Hoses can be connected to most anything that may contain undesirable substances such as chemical sprayers, buckets and pools, stock troughs. Plumbing Code requires that all threaded potable water outlets (hose bibs or sill cocks), except

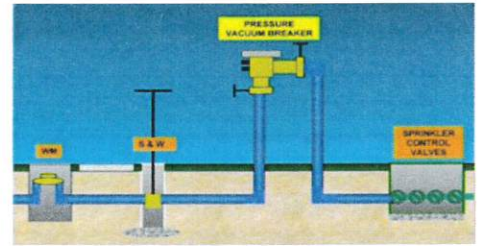

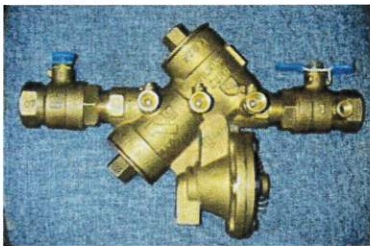

water heater drains and clothes washer connections, be protected by a non-removable hose bib vacuum breaker or an atmospheric vacuum breaker. The installation of a hose bib vacuum breaker is an inexpensive way to protect against contamination.

Landscape Sprinkling System

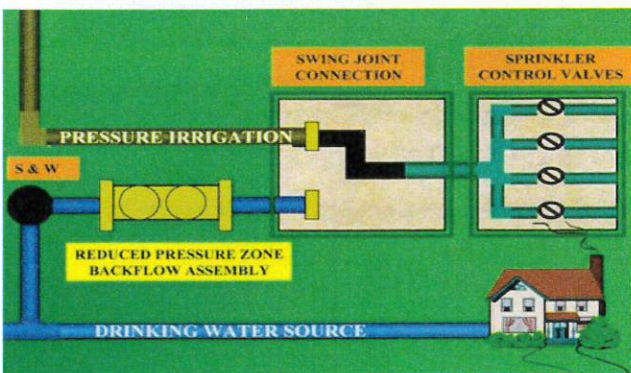

The Plumbing Code requires that all landscape sprinkling systems connected to the public drinking water system be equipped with an approved backflow

prevention device or assembly. Landscape irrigation systems could subject the drinking water supplies to things such as fertilizers, pesticides and animal waste.

Any sprinkling system that can utilize both public drinking water supplies and secondary water supplies must follow specific plumbing regulations to prevent raw water from entering the drinking water system!

Please contact your local drinking water supplier for specific requirements regarding landscape irrigation systems and which type of backflow prevention is appropriate for your landscape irrigation system.

Where can I get more info or have my questions about cross connections answered?

Call your local public drinking water agency or plumbing inspector regarding cross connection control and backflow prevention requirements in your area.

For further info, call the Utah Division of Drinking Water at (801) 536-4200.

MAYFIELD TOWN

Mayor's Corner
November 1, 2023

The late summer and thru fall have seen the leaves change and drop, may local and visitors traveling through town to the adjacent mountains with occupants dressed up in Camo and then orange through the hunting season. There is nothing like the smell of wet aspen leaves on a crisp morning or sitting on a south facing ridge on the mountains on a warm sunny day having a sandwich for lunch and visiting with friends and family. I will use the verbiage of an old timer who said with a thick Sanpete drawl: "It don't get much better than this".

A lot to report so I will be brief.

1. The booster pump project on the canyon road is nearly complete waiting for a final computer programing input. This will allow us to pump Lower 12 Mile Spring to the upper tanks.
 2. We got late in requesting bids for some road chip sealing. We will get that advertised for summer 2024 work. We are setting up a road plan for regular maintenance.
 3. We are working on light bid for the pickle ball courts, and ADA parking for the park so we have hard surfaces to the walking path.
 4. We are working to clear trees that have grown up in the street right of ways around town. There are some scattered around town.
 5. As you know we have lost trees in the cemetery to aging. We have 5 more that need to be cut down. We will need some volunteer help to get them down. There will be wood available for families in town to cut up and use.
- We are grateful for all that Jake has accomplished in his first year with us as our maintenance director. Thanks to each you for being good citizens. I receive many compliments that Mayfield is really a special place to live.

Thanks to all.

Mayor Steve Anderson,
Town Council Members: Aaron Peterson, Mike Bennett, Jake Dyreng, Mitzi Fuller.
Clerk Recorder: Amanda Bennett
Treasurer: Krista Dutton
Public Works Jake Nielson.

FUN FACT

- Back in 1960 a 16 pound turkey would cost \$3.06. Today's price is roughly around \$20.80 that an increase of 580%
- The first thanksgiving was celebrated in 1621 over a three day harvest festival.
- The Green bean casserole was invented by a Campbell soup employee.
- Benjamin Franklin wanted the turkey to be the national bird instead of the bald eagle.
- Around 88% of americans eat turkey on thanksgiving.
- Turkey wasn't on the menu at the first thanksgiving.
- 46 million turkeys are eaten every year.
- The 1st Thanksgiving was held in Plymouth Massachusetts.
- Each year, the president pardons a turkey from not being eaten.

WE WANT TO HEAR FROM YOU!

What would you like to see in future newsletters?

DID YOU KNOW?

Why are lead pipes harmful?

High levels of lead in tap water can cause health effects if the lead in the water enters the blood and causes high blood lead level. It can cause damage to the brain and kidneys, and can interfere with the production and red blood cells that carry oxygen to all parts of the body.

WATER LINE INVENTORY SELF ASSESSMENT

Please complete the form to help identify the material of your water service line.

RESIDENT INFORMATION

First Name: _____

Last Name: _____

Phone Number: _____ Email: _____

Property Address

Street: _____

City: _____ State: _____ Zip: _____

Water Bill Account Number: _____

Type of Occupancy (please circle one): Owner Renter/Tenant

PIPE INFORMATION

Based on the appearance, testing, or existing records, please mark the appropriate material of your water service line. Use the image below for visual identification if you are able to do so.

Lead
A dull, silver-gray color that magnets will NOT cling to.

Copper
The color of a penny.

Galvanized
A dull, silver-gray color that magnets will cling to.

Plastic
White, rigid pipe that is joined to water supply piping with clamp.

- 4 year term Keston Christiansen
- 4 year term Cat Medler
- 2 Year term Catherine Bartholomew

Congratulations to our new council members we are excited to see what new things you bring to Mayfield.

FROM THE OFFICE OF

The Elves
OF THE NORTH POLE

Hey Mayfield,

My Name is Elfie, I have been sent here on a extra special mission to help Santa Claus with the Naughty or Nice List.

I will be hanging around your town Dec 1st through Christmas Eve to send special reports back to the North Pole.

Come Find me around Mayfield to get a special treat. I will have a new treat every day to see what good little boys and girls finds me to get extra point for the Nice List.

Boys and Girls please remember don't touch me I was only given enough magic to stay here for 24 days and to get back to the North Pole to help Santa.

Remember I will be watching who is naughty or nice.

Sincerely, Elfie

STOP!

DO YOU KNOW WHAT YOU'RE DOING? EATING THE BARS OFF MY CHOC'LIT BUNNY?

YES, BUT WHY? CAUSE I WANT TO?

LISTEN CAREFULLY, I'M GONNA TEACH YOU AN IMPORTANT LIFE LESSON!

THE EARS OF A CHOC'LIT BUNNY ARE THE YUMMIEST PART.

BUT IF YOU EAT A WHOLE CHOC'LIT BUNNY AND SAVE THE BARS FOR LAST, YOU'LL BE TOO FULL TO ENJOY THEM.

SO, YOU EAT THE EARS FIRST? BUT THAT'S WHAT I WAS DOING!

YES, BUT NOW YOU KNOW WHY?

WHAT WOULD YOU DO WITHOUT ME?

IT WOULD BE SO NICE TO FIND OUT!

11/23

WHAT'S NEW!!!!

WE HAVE ADDED A SECOND PAYMENT DROP OFF BOX.

IT'S A DRIVE UP BOX LOCATED IN THE BACK OF TOWN HALL

NEWSLETTER
